

I listen to K-Love on 91.3 on my radio and I klisten online at work. I believe that K-Love is an asset because it promotes family values and positive encouragement for everyone. It is extremely uplifting for me and my family. I also greatly appreciate the fact that I don't have to listen to all the mindless commercials on other radio stations. I do not believe that changing to a LPFM would be beneficial to those of us that enjoy K-Love all over the United States. I like the fact that my friends and family and I can listen to the same programming even though we are in different states.
